Education

HKBK COLLLEGE OF ENGINEERING **June 2017 - June 2021**
*B.E IN ECE (**CGPA of 8.5**)* *KARNATAKA, India*

Technical Skills

Languages: HTML, CSS, JavaScript, Typescript, C#
Developer Tools: VS Code, Postman, Netlify, GIT, Vercel.
Technologies/Frameworks/Database: Angular, Bootstrap, Angular Material, ReactJS, Tailwind, MySQL, GitHub, .NET Core , Restful API.

Experience

LTIMINDTREE **Sep 2024 - Present**

Senior Software Engineer

- Developed and integrated dynamic UI components using Angular, Angular Material, and Bootstrap, ensuring responsive design and seamless user interaction across devices.
- Integrated RESTful APIs with .NET Core, enhancing application responsiveness and maintaining optimal performance.
- Led the end-to-end integration of Angular with .NET Core, ensuring smooth data flow and efficient application performance.
- Designed and implemented a Web API in .NET Core to retrieve user information based on employee ID, successfully integrated with Angular frontend for real-time data access.
- Delivered a production-ready IFulfill HR Application using Angular, contributing to both feature development and resolution of production-level issues to improve user experience.
- Optimized application performance by implementing advanced features such as lazy loading, skeleton loaders, module-based architecture, and virtual scrolling, significantly reducing initial load time and enhancing scalability.

Software Engineer **Sep 2021 – Sep 2024**

- Developed a responsive UI for **Auto-mailer** that can handle various business contents to be shown for the end-user triggered from the scheduler, which supported outlook from application and webpage.
- Worked on UI development and functionality of **Employee Skill Management Project** which used **CRUDE** operation, enabling end-users (HR) for smooth maintenance of employee proposals.
- Co-ordinated with the team members to identify and resolve the existing bugs.

GE Electronics **Feb 2021 – May 2021**

Intern

- Developed and deployed a key user interface (UI) feature for an internal GE application using **HTML, CSS, and TypeScript**, enhancing user interaction and visual consistency.
- Improved application performance by **optimizing REST API usage**, converting blocking synchronous calls into **asynchronous operations**, and implementing efficient response handling to enhance user experience.

Projects

Portfolio **Live** | **Github**

A responsive portfolio website built with Angular, Angular Material, and Bootstrap, featuring a clean UI, modular components, and smooth navigation to showcase projects, skills, and contact details.

Task Management Application **Live** | **Github**

A sleek and modern Task Management application designed to help users efficiently organize their daily activities. The app supports full CRUD (Create, Read, Update, Delete) operations, enabling seamless task creation, editing, completion, and deletion. With a refreshed user interface and support for both dark and light themes, the app offers a visually appealing and user-friendly experience tailored to individual preferences.
